12.1	Examples	13

1 Linear Time-Invariant Systems

1.1 Examples

2 Stability and Performance Analysis

2.1 Examples

3 Introduction to Control

3.1 Examples

4 Design of PID Controllers

4.1 Examples

5 Root Locus

5.1 Examples

6 The Nyquist Plot

6.1 Examples

7 Dynamic Compensators and Stability Margins

7.1 Examples

8 Implementation

8.1 Examples

9 State Feedback

9.1 Examples

10 Observer Design

10.1 Examples

11 Optimal Control

11.1 Examples

12 Kalman Filter

12.1 Examples
