

Exam Notes

Mathias Balling Christiansen

3rd Semester

Considerations for next time:

1. Presentation needs to be more organised and provide a quick overview. Videos work great. Someone that hasn't seen the report should know what is going on.
2. When writing the report a lot of effort should be put into testing and precisely describe why things work and why things doesn't.
3. Find the cause of a problem, not just the effect.
4. Structure the report/testing after the subproblems
